

## 150 Best Financial Advisers for Doctors – Medical Economics

Congratulations to Ron Dreese on being selected as one of the nation's 2008 Top 150 Best Financial Advisers for Doctors by Medical Economics Magazine in their 2008 November issue. Financial experts were chosen based on nominations from physician readers, knowledge, experience, geography, fee arrangements, minimum portfolio size and advisers that are in good standing with the Securities and Exchange Commission and the National Association of Securities Dealers. This is the second consecutive time that Ron has been a recipient of this prestigious honor.

In addition, Ron was solicited by Medical Economics Magazine to provide financial survival secrets during this volatile time. His insight has been published on the Medical Economics website. Ron offers this advice for investors:

*"Volatility and correction are inherent throughout market cycles. P/E ratios are in many cases at historic lows and may well represent buying opportunities. Remember, most of you are in it for the "long haul". Diversify your holdings appropriately and focus on your time horizon. Do not become preoccupied with short-term performance."*
